

Non-Linear Video Editing Specialist

DAN

ROLDAN ANCAJAS

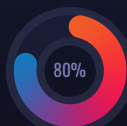

10 years of cumulative expertise and experience in the battlefield of **Non-Linear Video Editing** and **Motion Graphics**. Corporate brick wall was my creative West Point. But creative fire-in-me is congenital and genetic. So, it all started way before I was even paid to do it. Now, I have since been part of every company's growth and profitability by building their promotional presence through the power of Video Editing - deploying industry standard and best practices.
